

A LOOK TO THE FUTURE.

BEWEGUNG MIT SYSTEM

A LOOK TO THE FUTURE.

BEWEGUNG MIT SYSTEM

A tradition of innovation

GEZE in the buildings of the world.

GEZE GmbH is one of the most successful providers of building systems for door, window and safety technology in the world. As one of the market, innovation and design leaders, the company, which was founded in Stuttgart in 1863, develops, manufactures and sells pioneering technology that has played a key role in influencing building technology. With its 27 subsidiaries and a comprehensive network of representatives, GEZE is represented in almost every corner of the globe.

Company success through ...

A power to innovate and experience:

We develop system solutions and anticipate the needs of our customers and the market.

Technical know-how and quality:

Highly qualified, creative employees; systematic innovation management; and precision combine to develop reliable, safe and user-friendly products with outstanding designs.

A focus on service and individuality:

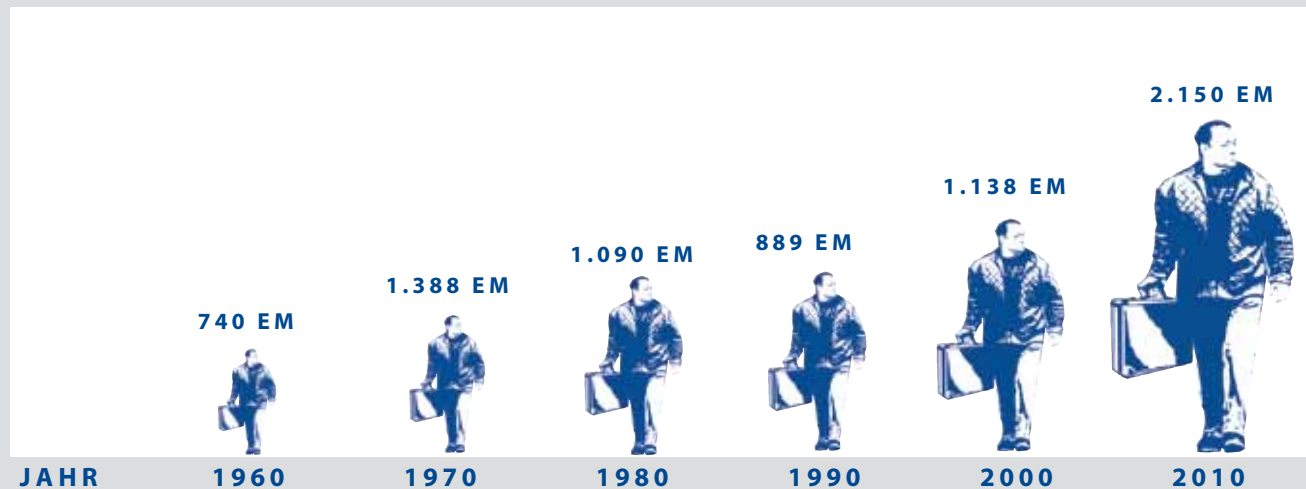

Our thoughts and actions are defined by providing our customers with a complete service and product-specific solutions: From design engineering to realisation to servicing the systems.

DEVELOPMENT OF THE WORKFORCE

From Leonberg to the world ...

- Over 2,000 employees worldwide
- 110 countries
- 27 subsidiaries
- 2010: turnover of just less than 400 million euros

Foreword by the Management

Dear Customers and Business Partners,

The name GEZE stands for innovation and the highest quality products, processes and service. As a medium-sized family enterprise, we provide architects, planners, processors and retailers with a broad range of products and systems in the field of door, window and safety technology. GEZE has been one of the most well-known service providers and largest players on the international market for many years now.

GEZE products can be found in key buildings across the world. They fit discreetly and elegantly into every kind of architecture. Reliable, safe and silent, they impress with their comfort and design. We are proud of our traditions, our success and our reputation. They are what drive us to achieve great things. Each and every day.

Discover GEZE for yourself!

I hope that you enjoy reading this brochure and look forward to working with you in the future!

Yours

Brigitte Vöster-Alber,
Managing Partner

A multitude of experience

Over 145 years of success

Pioneering spirit and meticulous working have a tradition at GEZE, and it spans back to the founding of the company in Stuttgart-Feuerbach in 1863. The small construction fittings factory soon developed into a leading developer and manufacturer of systems for door, window and safety technology.

Today GEZE door closers are some of the best known in the world. GEZE has proven its power to innovate with numerous awards, including, for example, the “Top 100” innovation prize in 2002 and 2009.

1863

Carl Bauer sets up the "construction fittings factory" in Stuttgart-Feuerbach.

1898

Production begins on ski bindings to utilise summer and winter production.

1911

The product range is expanded to include skylight openers, door closers and hold-open systems.

1936

Christel Kranz and Franz Pfnür win gold medals at the Winter Olympics with GEZE's "Kandahar" ski bindings.

1938

75-year company anniversary. The company now has 300 employees and has developed into a recognised medium-sized company.

1959

The company moves to Leonberg.

1968

Reinhold Vöster transfers his share of the company and, with it, the management to his granddaughter Brigitte Vöster.

1980

The product range focuses on complete solutions for doors and windows. Automatic door solutions gain increasing significance.

1996

A production site is founded in Tianjin, China.

1997

The Slimdrive SL automatic sliding door drive is premiered. With a height of just seven centimetres, it represents a milestone in product design.

Since 1999

The company has continued to expand internationally, and now has 27 subsidiaries and numerous representatives across the world.

2005 and 2008

GEZE receives the "TOP JOB" seal of approval and the "TOP Employer in Germany 2008" award for outstanding staff management.

reddot design award
winner 2009

2009

GEZE once again receives the "TOP 100" award for innovations, ideas and investments, as well as the „reddot design award“ for outstanding product design.

2010

Construction begins on an ultra modern production site in Zrenjanin, Serbia.

The new distribution centre in Leonberg opens for business.

Made in Germany

GEZE stands for "Made in Germany" quality. Across the globe. This is why, no matter where GEZE products are manufactured, they are produced and installed in line with German quality standards. But the seal of quality represents more than this: At GEZE this is confirmed by the innovations and by the focus on the future, both of which are systematically promoted. This does not just apply to the technical side of things; instead it is also relevant to intelligent functionality, sustainability and unique design.

GEZE products and system solutions are subjected to constant monitoring, both from within the company and by external authorities, and possess numerous international approvals, test certifications and quality marks, which have been awarded by national and international institutes. These guarantee the high GEZE quality for both Germany and the rest of the world.

In recent years, GEZE has brought numerous new products and innovations to market, which will not just improve our future; they are also improving our lives today. This is why GEZE is in the top 15 percent of companies with the most patents in Germany. At the end of 2010, GEZE had over 305 national patents and patent applications. Abroad the figure stood at 403. The unique nature and distinctiveness of GEZE products is protected with 230 registered trademarks. This sees GEZE ranked in 16th place according to the statistics published by the German Patent and Trademark office.

2 | GEZE global locations

GEZE global locations

In order to be able to supply customers around the world with products in the quickest possible time, the products are manufactured in various locations across the globe. **GEZE company headquarters** have been located in **Leonberg**, near Stuttgart, **since 1959**. Over 900 highly qualified employees utilise their expertise and skills in a centre of excellence and ultra modern production facility. The combined know-how of the staff is used to create innovative and pioneering products. Leonberg and Germany will remain the key locations for development and production in the future.

In **1996**, GEZE founded a **production site** in the Chinese port of **Tianjin**. Today the hundred-percent subsidiary is extremely successful, and employs over 300 members of staff. This direct engagement in China serves both to meet the increasing demand on the Asian and global markets, and to consolidate GEZE's position within the region.

2010 saw a further **production site** open its gates in the Serbian town of **Zrenjanin**, near Belgrade. This site is contributing to intensifying relations in the Eastern European markets.

A passion for innovation

GEZE in the buildings of the world

Integrated planning and compatible products are a key pre-requisite for realising project solutions and for perfectly coordinated building technology. GEZE project solutions fulfil the highest requirements when it comes to functionality, quality and design.

Prestigious buildings across the world are fitted with GEZE products and system solutions. These include the Mercedes Benz Museum in Stuttgart, the Palacio de las Artes Reina Sofia concert hall in Valencia, and the Acropolis Museum in Athens, which opened in 2009.

GEZE Project Consulting

We support you from the start

The knowledge, which, as a developer, manufacturer and system integrator, GEZE has accumulated through the realisation of numerous projects, is of real value, and we use it to help support our customers. This was the seed from which GEZE Project Consulting grew into its own part of the company. We support architects, specialist planners, general contractors and clients through every stage of construction, with a wide range of services, wherever in the world your project may be.

Our support starts with draft planning and goes beyond project completion. We coordinate the interfaces between the individual trades. This saves you both time and money. We also offer an efficient after-sales service.

Integrated sales and service

GEZE's field of expertise

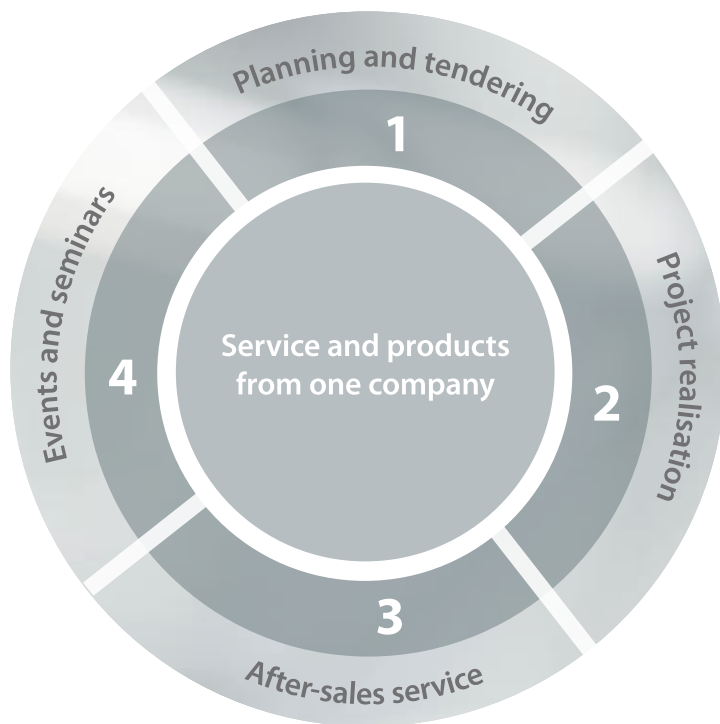

GEZE products make our lives better and safer. Architects and planners, processors and end users have the highest demands when it comes to functionality and durability. In order to guarantee both, GEZE quality is at the heart of everything we do – from product development to production, in our sales and service network, and, of course, when we put our solutions into your project.

GEZE Service

Maintenance of the highest order

The importance of servicing automatic systems regularly and having them maintained by qualified personnel for the long-term safety of people and the systems themselves cannot be overstated. Keeping people safe is the fundamental function of emergency exit systems. The constant monitoring and maintenance must, therefore, always be ensured.

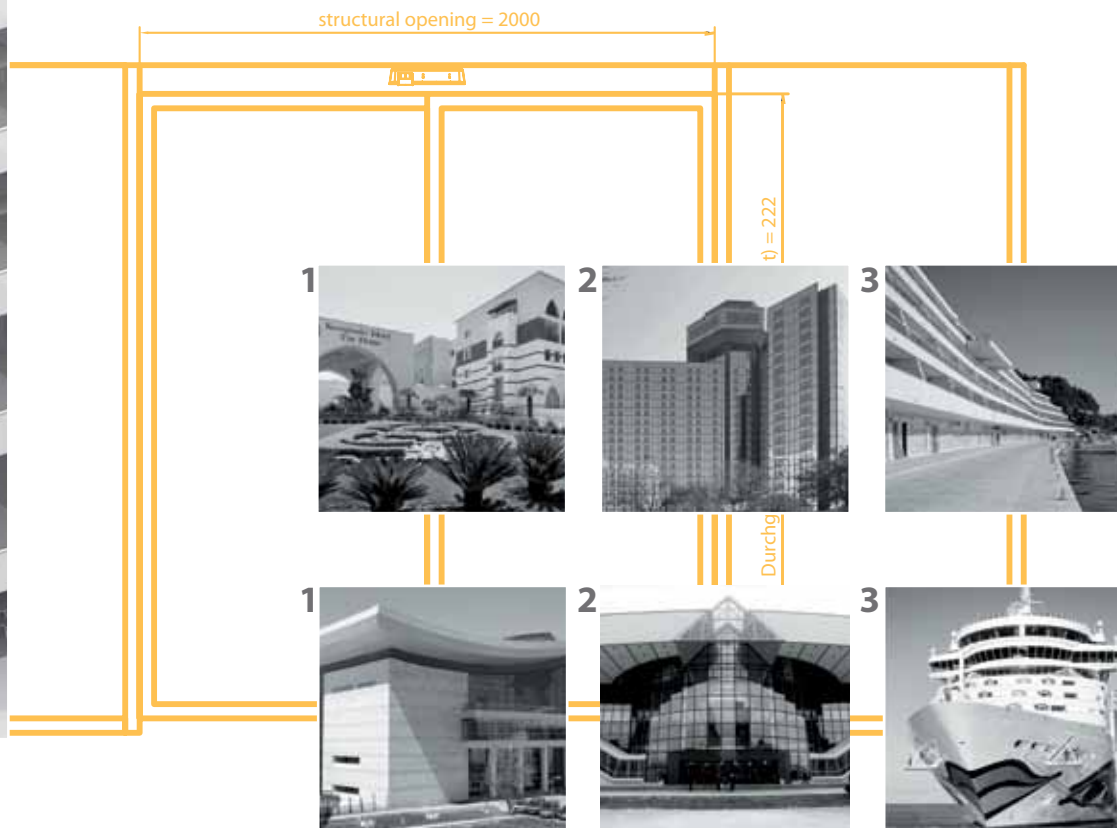

Being able to provide a reliable, competent and highly efficient customer service is one of our most important goals when it comes to keeping our customers satisfied.

Sustainability as a company concept

A basic principle of our responsibility

Ecological, economical and social responsibility stand at the heart of sustainability at GEZE. Preserving the livelihood of future generations is part of our responsibility as a society. Continuously improving the ecology of products and production sites, as well as dealing with natural resources in a responsible way, are part of the principles that we follow on a day-to-day basis. From product development to production to sales and service - we work in line with the latest environmental standards.

- 1 | GEZE is a member of the DGNB (German Sustainable Building Council)
- 2 | Energy-efficient production facilities
- 3 | GEZE company headquarters in Leonberg
- 4 | Presenting a cheque to the Olgäle Foundation

Economic responsibility

Economic responsibility is closely linked with the company's principles. It includes the claim to expand using our own resources as a matter of principle, and to secure jobs over the long-term. The exceptionally high equity ratio of 80 percent allows GEZE to maintain its independence from third parties.

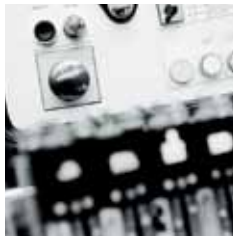

Social responsibility

Through our commitment and participation in society and social affairs, we want to help promote social development and to enrich cultural life. Our work has many forms, including the generous financial support of the Olgäle Foundation for Sick Children e.V. in Stuttgart, the German Children's Cancer Foundation, and the Stuttgart House of Literature.

4

Ecological responsibility

As a "Top 100" innovator, GEZE uses sustainable investment and innovations to fulfil the latest technical standards. Questions of sustainability are considered throughout the product development stages.

We employ our own in-house Environmental Protection Officer, and are continuously looking towards reducing our consumption of energy. We achieve this

with the help of modern lighting controls, energy-efficient production and conveyor facilities, and, not least, through the responsible measures taken by our employees. In line with the strategy "Avoid - Utilise - Dispose", at GEZE the motto is to avoid rubbish being created in the first place. Thanks to the high proportion of metallic raw materials in GEZE products, they are great for recycling.
